All About Matter

Key Question: What are the types and properties of matter?

Directions: Answer the questions using complete sentences.

Matter

1. What is matter?

2. Matter takes different forms. What are three forms you already know about?

3. Draw a picture of an example of each of the three forms of matter you know about. Write a caption under each picture to explain it.

All About Matter (cont.)

What is Matter?

4. People can describe objects four different ways. How do people describe objects?

5. What does a property describe?

6. All objects have two properties. Name them.

7. All objects are made of very small parts you can't see with your eyes. What are these parts called?

States of Matter

8. Look at each form of matter to see what the particles look like. Draw a picture of the particles in each form of matter. Label each drawing with a caption to explain what form of matter it is.
